

Jalios - SDK 4 Eclipse - Bug #1156

Mieux remplir le build.properties

09/03/2018 07:03 PM - Sylvain Chatagnon

Status:	Nouveau	Start date:	09/03/2018
Priority:	Normal	Due date:	
Assignee:	Alvin Adscott	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			

Description

Le build.properties initial comprend :

```
webappName=${webappName}
build.war.enabled=true
isPrivate=true
```

Il serait plus intéressant de repartir sur la dernière version du build.properties, exemple fonctionnel :

```
#-----
#--- Jade jcmsartefact folders ---
#-----
# The original web app and modules for this build
# Common War dirs: "war-jcms-9.0.3", "war-jcms-9.0.4", "war-pme-3.0.8", etc
# Common Latest Apps dirs: "apps-jcms-9.0.3", "apps-jcms-9.0.4"
# Patches dir (patch from R&D): "patches-jcms-9.0.4"
src.war.dir=war-pme-4.0.2
src.apps.dir=
src.patches.dir=
#-----
#--- WepApp Generation -----
#-----
# War filename
webappName=jplatform
# Webapp version: will be automatically filled with your plugin version. Uncomment below to overri
de
#webappVersion=1.0
# Build the war ?
# Possible values: true or false (default: true)
build.war.enabled=true
# Profile used to build final custom.prop, log4j.xml and web.xml
# Optional, empty value will use the .ref files
build.war.profile=
# Clean other files: custop.prop.ref, store.xml.ref.
# Possible values: true or false (default: false)
build.war.cleanup=true
# Is it a private site (always true for JReady)
# Possible values: true or false (default: true)
isPrivate=true
#-----
#--- Plugin source -----
#-----
# Embed sources into your plugin ?
packagePluginWithSource=true
#-----
#--- Added modules -----
#-----
# Modules you want to add to war (which are not a dependency of your custom plugin)
# Use plugin name with comma separated ant WITHOUT space
# Example: pluginList=WebChatPlugin,MySQL5Plugin
```

```
# Patch plugin (example) : PatchPlugin
pluginList=
# Agora (JReady specific) remove embedded module
# Example: AgoraUnwantedPluginList=BookmarksPlugin,TasksPlugin
AgoraUnwantedPluginList=
#-----
#--- Ugly Patches -----
#-----
# Patches you want to add to war (mainly patch from R&D)
# Those patches will be automatically bundled into a dedicated jcms Plugin
# Add patches file names with comma separated ant WITHOUT space.
# Example: patch_JCMS-5842_jcms-9.0.4.zip,patch_JCMS-5740_jcms-9.0.4.zip
patchList=
# Name of the Patch Plugin (optional, default: PatchPlugin)
patchPluginName=
# Version of the Patch Plugin (optional, default: 1.0)
patchPluginVersion=
```

A voir avec Nicolas Dupont si cela correspond bien à la dernière version du build.properties
